revised

engine limits have been established for the Model 7GCBC seaplane (S/N 1198-80 and up). The revised limits are:

- Engine limits: Maximum normal operating, 2500 r.p.m. (118 hp.)
- For all other operations, 2700 r.p.m. (150 hp.)

NOTE 12. Effective March 1, 1979, each Model 7ECA, 7GCAA, and 7GCBC airplane contains as FAA Approved Airplane Flight Manual which is part of the required equipment. The AFM must remain in the airplane during aircraft operations.

Airplane Flight Manuals are required for the following airplanes:
